PROFILE

Portfolio ⧉
- Frontend Developer specializing in React.js.
- Experienced in building dynamic, responsive interfaces with modern JavaScript, React Hooks, and REST APIs.
- Focused on writing clean, maintainable code and delivering great user experiences.

EXPERIENCE

Reactjs Developer Intern, *ITI*   08/2024 – 09/2024
                                                                  Menofia, Shebin El-Kom
- Contributed to open-source React projects, collaborating with other developers and gaining valuable experience in real-world development scenarios
- Built multiple React applications using a combination of React, Redux Toolkit, and React Router, demonstrating a strong understanding of these technologies
- Utilized Redux Toolkit to manage application state efficiently, simplifying complex data flows and enhancing application performance
- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.

EDUCATION

Bachelor of Science in Computer Science, *Menofia University*   09/2021 – 07/2025
GPA: *3.08*   Menofia, Shebin El-Kom

TECHNICAL SKILLS

Languages
- Python
- Java
- C++
- JavaScript

Developer Tools
- VS Code
- Git
- GitHub
- Figma

Frontend Skills
- Html5
- Css3
- JavaScript
- React JS
- Redux
- ReactQuery
- TailwindCSS
- BootStrab
- Styled Components

Soft Skills
- Teamwork
- Presentation
- Leadership

PROJECTS

World Wise Website ⧉
Javascript, Reactjs, ReactRouter, React Query, Styled Components
- Create a React application with a single page that displays multiple-choice questions.
- Design and build a user interface using React components for adding, editing, and deleting City.
- Implemented Selenium to create an instance of Chrome in order to interact with the correct elements of the web page.
- Create a set of reusable React components for common UI elements like buttons, forms, modals, and navigation bars.
- Implement error handling to gracefully handle cases where API calls fail.

Movie PopCorn ⧉
Html5, Css3, Javascript, Reactjs, Context Api
- Use React's state management (useState hook) to store movie data, search terms, and loading/error states
- SearchBar: Component for handling user input and triggering searches. MovieList: Component for displaying a list of movies returned by the API.
- Movie: Component to render details for each individual movie (optional).

Weather App ⧉
HTML, CSS, JavaScript (ES6), API requests, JSON data
- Weather App is a simple web application that shows real-time weather information for any city.
- It fetches weather data from a public API, displays current temperature, weather conditions, and updates dynamically based on user input.
